

TULIPS

NIPPLE SHIELDS

Support pain-free breastfeeding
in difficult circumstances

TULIPS

NIPPLE SHIELDS

Make it easier for babies to latch on

- For problems with sucking and latching on
- Also ideal for unusual nipple shapes
- Easier for preterm infants to suck
- For sore and painful nipples

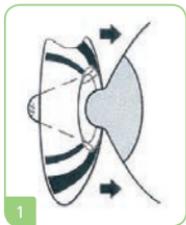

Happy Mothers for Happy Babies

Caring for a new baby is very time-consuming, so leisure time is a luxury for every new mother. Ardo's nursing products have been designed to make the everyday routine easier for a breastfeeding mother. The reliable products help save precious time and thus create a bit of independence. **Because Ardo knows that happy mothers make for happy babies.**

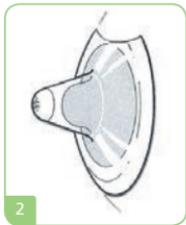

Making breastfeeding an enjoyable time

Ardo developed their practical Tulips so that mother and baby can enjoy breastfeeding even in difficult circumstances. The nipple shields help support pain-free breastfeeding by making it easier for the baby to latch on, and protecting and relieving the severely stressed nipples. The special tulip shape means that the baby experiences the smell of its mother close up. Now with a new, attractive storage box for increased portability and hygiene.

Protective. Gentle. Soft.

Tulips nipple shields are an ideal aid for problems with sucking and latching on, and also for preterm infants because they make the nipple easier to take hold of. Nipples may become sore and painful when you are breastfeeding. Tulips nipple shields relieve and protect the nipples so that symptoms quickly subside. They are also ideal for unusual nipple shapes. The soothing breastfeeding aids, made of extremely thin, soft silicone, are pleasant to wear against the skin, with a neutral odour and taste and contain no bisphenol A.

The tulip-shaped nipple shields are slipped over the nipple creating a close fit (see illustrations on the left).

Tulips are available in two sizes:

Size M: with four holes for a slower flow – makes it easier for full-term babies with small mouths and for preterm infants to suck at the breast

Size L: with five holes for full-term babies and babies of normal weight

Tulips Nipple Shields

Contents: 2 nipple shields, 1 storage box

Size: M (20 mm diameter)
